Re: Approval of Plans for Low Pressure Sewer  
Force Main for Mahopac Beach  
(T) Carmel  
TM# 75.43-1-22

Dear Sirs:

This office has received the application, engineering report, plans and specifications for the wastewater facilities for the above-noted project. Upon review, it has been determined that the submission meets the applicable criteria of the NYS Department of Environmental Conservation and the Putnam County Health Department.

The approval of plans is issued under provisions of Article 17 of the Environmental Conservation Law and 6 NYCRR 652, and is issued for plans consisting of 2 B/W sheets prepared by Jeffrey Contelmo, P.E. and dated March 3, 1992 with the with the latest revision date of January 29, 1993. This letter of approval of plans and a set of the approved plans should be filed in the appropriate office of The Mahopac Beach.

This letter shall serve as record of approval and, by initiating construction of the project covered by this approval of plans, the applicant accepts and agrees to abide by and conform to the following:

1. THAT this approval letter shall be maintained on file by the applicant.
2. THAT the approval is revocable or subject to modification or change pursuant to Article VIII of the Putnam County Sanitary Code and Article 17 of the Environmental Conservation Law.
3. THAT the facilities shall be fully constructed and completed in compliance with the engineering report, plans, and specifications as approved. The Putnam County Health Department must be notified when construction commences on the sewer collection system and provided with a construction schedule.
4. THAT the construction of the facilities shall be under the supervision of a person or firm qualified to practice professional engineering in the State of New York under the Education Law of the State of New York, which supervision is the responsibility of the applicant.

5. THAT the professional engineer supervising such construction shall certify to the Department in writing, that the constructed facilities have been under his supervision and that the works have been fully completed in accordance with the approved engineering reports, plans, specifications and approval of plans.
6. THAT the certification, including acceptable results of leakage testing of the completed work, and "as-built" plans shall be forwarded to the Putnam County Department of Health after completion of construction and at least within thirty (30) days thereof.
7. THAT the facilities shall not be placed in operation until construction has been completed and the Department has accepted, in writing, the certification of construction and results of leakage testing.
8. THAT the facilities receive approval from the New York City Department of Environmental Protection prior to any operation of the sewage pumping station.
9. THAT construction conforms with applicable ordinances of the Town of Carmel.
10. The wastewater facilities are to receive sanitary wastes only. The Putnam County Health Department shall be promptly notified in the event that any wastes other than strictly domestic sanitary wastes are produced at this facility.
11. The facilities shall be constructed and completed in compliance with the engineering report, plans, and specifications as approved by this Department. Any modifications to the approved plans and specifications shall require prior approval by this Division.
12. This approval does not authorize any reconstruction or expansion of the restaurant facility. Any such reconstruction or expansion of the restaurant facility must receive the prior authorization from the Putnam County Department Health.

This approval of plans is issued for approximately 1370 LF of two (2) inch low pressure force main and appurtenances and is issued for State Commissioner of Environmental Conservation.

Very truly yours,

John Karell, Jr., P.E.  
Public Health Director
